3-1 thru 3-680	 0		

CAUTION: This publication is valid only if complete of all pages with the appropriate Change Number as listed above.

TABLE OF CONTENTS

SECTION NO.	FIGURE NO.	TITLE	PAGE NO.
I INTRODUCTION			
		INTRODUCTION AND INSTRUCTION ON THE USE OF THE ILLUSTRATED PARTS CATALOGUE	1-3
		CROSS REFERENCE BETWEEN FLEET SERIAL NUMBER (FSN) AND PRODUCTION SEQUENCE NUMBER (PSN)	1-9
		LIST OF ABBREVIATIONS	1-10
		LIST OF EQUIPMENTS WITH SEPARATE IPC	1-12
		LIST OF MANUFACTURERS CODE AND ADDRESSES	1-13
		HOW TO USE ILLUSTRATED PARTS CATALOGUE	1-24
		AIRCRAFT OVERALL DIMENSION	1-28
		FRAMES AND RIBS SCHEME	1-29
		AIRCRAFT ZONE AND SUBZONE	1-31
II MAINTENANCE PARTS LIST			
11 PLACARDS AND MARKINGS			
	11-20-00		
	01	FUSELAGE OUTSIDE MARKING INSTL, Z31-32-33-34-35-14-24	2-4
	02	WING OUTSIDE MARKING INSTL, Z11-21	2-9
	03	NACELLE OUTSIDE MARKING INSTL, Z12-22, LH-RH	2-11
	11-30-00		
	01	AIRCRAFT INSIDE MARKING INSTL, Z31AB	2-13
21 AIR CONDITIONING			
	21-10-00		
	01	REGULATOR AIR FLOW INSTL, Z32BA	2-16
	02	AIR CONDITIONING SENSITIVE LINE INSTL, Z32AA-32AB	2-18
	21-20-00		
	01	AIR CONDITIONING INSTL - FWD FUSELAGE, Z31AA-31AB	2-24
	02	VENTILATION INSTL - FWD FUSELAGE, Z31AA-31AB	2-32
	03	DUCT ASSY WEATHER RADAR COOLING INSTL, Z31BA	2-42
	04	AIR CONDITIONING INSTL - CENTER FUSELAGE, Z32BA-32AB	2-44
	05	AIR DISTRIBUTION INSTL, Z32AA-32AB-32AC-32AD	2-59
	06	AIR CONDITIONING INSTL - CENTER WING, Z33AA, LH-RH	2-69
	07	AIR CONDITIONING INSTL - NACELLE, Z12AC-22AC, LH-RH	2-72
	21-30-00		
	01	PRESSURIZATION CONTROL PANEL INSTL, Z31AA	2-75
	02	CPCU UNIT INSTL, Z31AB	2-77
	03	PRESSURIZATION INSTL - FWD FUSELAGE, Z32AB-32AC	2-79
	21-50-00		
	01	AIR CONDITIONING COOLING INSTL - CENTER FUSELAGE, Z32BA	2-85
	02	AIR CONDITIONING INSTL - MLG RH FAIRING, Z23AA	2-87
	21-60-00		
	01	ECS TEMPERATURE CONTROL INSTL, Z31AA	2-94
	02	TEMPERATURE SENSOR BOX INSTL, Z31AB	2-96

SECTION NO.	FIGURE NO.	TITLE	PAGE NO.
	03	TEMPERATURE SENSOR BOX INSTL, Z31AB	2-99

INTRODUCTION

INTENTIONALLY LEFT BLANK

INTRODUCTION AND INSTRUCTION ON THE USE OF THE ILLUSTRATED PARTS CATALOGUE

1-1 Purpose of this Manual

This Illustrated Parts Catalogue contains a spare parts breakdown related to the structure and systems of the C-27J Aircraft.

The information provided in this publication can be used for logistic purposes by personnel engaged in maintenance and stock management activities, and facilitates the identification, storage, distribution and purchase of the spare parts required by the Maintenance, Repair and Provisioning organization of the User.

For further information and instructions concerning the operation, maintenance, inspection, overhaul and repair of the equipment described in the present publication, interested personnel should refer to the following technical publications:

TCH.1C-27J-1	Flight Manual
TCH.1C-27J-1-1	Flight Manual-Performance Data
TCH.1C-27J-1CL-1	Flight Crew Check List
TCH.1C-27J-2-00FR	Fault Reporting

Some breakdown parts of Suppliers furnished equipments have been included in this Aircraft IPC, even if they should be preferably included into the equipments separate publications, because they are enclosed in the contractual recommended Spare Parts List, needed to support the operational Customer requirement and the relevant applicable maintenance actions.

1-2 **Structure of this Manual**

This Illustrated Parts Catalogue consists in the following parts:

-	Section I	Introduction
-	Section II	Illustrated Parts Data
-	Section III	Cross Reference Index

1-3 **Section II - Maintenance Parts List**

The Illustrated Parts Catalogue data are compiled in order to present an engineering breakdown of the Product in disassembly sequence, identifying all assemblies and their individual components, together with other detail parts which cannot be assigned to assemblies, in accordance with their Engineering Drawings and Bills of Material (BOM).

The hierarchical breakdown is reflected in the structure of the IPC data, which shows the engineering relationship of assemblies and their parts, listing the item in order of breakdown. The sequence of these items is given by the use of the Catalogue Sequence Number (CSN).

The level to which this breakdown is prepared is in function of the Maintenance, Repair and Overhaul activities to be carried out on the equipment described in the present publication and by taking into consideration the Logistic Support Analysis results and other engineering indications.

The Illustrated Parts Catalogue content is structured according to the chapterization concept given in ASD S1000D.

This concept identifies the Chapters and Sub-Chapters into which the data has to be organized, and hence provides values for the first three characters of the Catalogue Sequence Number (CSN).

The subdivision of these Sub-Chapters into Sub-Sub-Chapters, Units and Figures, in order to establish values for the remaining characters of the CSN, is undertaken with special regard to the particular content of each Sub-Chapter and to the effective pictorial representation of the Figures, given by relevant Illustrations.

Numerical Figure Numbers have been allocated sequentially, starting from 01.

The range of Figure Numbers is allocated within the same Chapter, Sub-Chapter, Sub-Sub-Chapter and Unit; when a change to this first six characters of the CSN is encountered, a new Figure Number range, starting with 01, begins.

The data elements relative to the items of an assembly are organized in Figures, which are supported with the appropriate illustrations.

Each illustration Sheet has its own Illustration Control Number (ICN).

The layout of the spare parts illustrations has been arranged according to the sequence of the breakdown operations of sub-assemblies from main assemblies, up to the details of the single components.

The indenture system used in the detailed part list shows the relationship of parts and assemblies to next higher assemblies or installations in assembly order as follows:

1 2 3 4 5 6 7

INSTALLATION

- DETAILED PARTS FOR INSTALLATION
- ASSEMBLY
- * ATTACHING PARTS FOR ASSEMBLY
 - • DETAILED PARTS FOR ASSEMBLY
 - • SUB-ASSEMBLY
- * * ATTACHING PARTS FOR SUB-ASSEMBLY
 - • • DETAILED PARTS FOR SUB-ASSEMBLY
 - • • SUB-SUB-ASSEMBLY
- * * * ATTACHING PARTS FOR SUB-SUB-ASSEMBLY

1-4 **Parts Data Elements**

The Maintenance Parts List contains the following elements:

A. **Fig. & Item No.**

The Figure No. and Item No. appear on the first line of each text page. Where an item is listed but not illustrated on the accompanying illustration, this is marked with a dash in this column, and the dash is in the same line as the Item No.

B. **Part Number**

These fields contains the Part No. assigned to the item by the Manufacturer. Part Nos. exceeding the available space are split with the overflow in the second line.

The P/Ns relevant to special parts modified by Alenia waiver documents, are identified for specific Manufacturer Serial Number with the same fixed part of P/N, followed by a variable part with - 7XX suffix (where XX is a progressive number).

Example: G1235331106-001 (P/N old), G1235331106-701 (P/N new).

Example: G1235331106-M(or -N, or -P)-xx/002/xxxxxxx.

C. **Description**

The description column contains the Description For Part together with the Description For Location. Additionally supplementary information, which relates to the part and its location, could also appear.

The layout of the description field is as follows:

- **Indentation**

The spacing is one bullet per indent, given by the Indenture Code.

- **Continuation lines**

Continuation lines of description are to the same indent as the first line of the description.

- **Attaching part**

Attaching part is distinguished by the replacement of the indentation bullet with an asterisk.

- **Supplementary information**

The description column is also used to convey supplementary information. In the construction of the description column, the content of the Description For Part appears first, followed by the contents of the Description For Location, followed by supplementary information.

Description For Location and supplementary information are given in brackets.

Different types of information within the brackets are separated by oblique strokes (/).

The supplementary information is presented in the following sequence:

- Storage / Shipping Part
- Calibration Marker
- Category I Container Location
- Fitment Code
- Refer To
 - The Refer To content can contain the National Publication reference of the equipment with its own Catalogue. The list of the National Publication reference is given in the List of Equipments with Separate IPC.
- Select Or Manufacture From Range
- Select Or Manufacture From Identifier
- MOD / PREMOD Indicator
 - The list of the Modifications inserted in this issue of the Catalogue is given in the List of Incorporated Modifications.
- Reference Designator

D. Quantity Per Assy (Qty per Assy)

These fields contain the number of units required for the next higher assy and the code for standard unit/quantity delivered to the Customer. If the abbreviation **REF** is indicated, the quantity of this item must be researched in another figure or represents the amount of a installative. The abbreviation **AR** (As Required) means that the item quantity has to be determined from time to time, according to the assembly requirements.

The abbreviation **NP** (Non Procurable) refers to particulars not furnished for spare parts.

E. Interchangeability

The data field contains two characters: the first character is used to indicate the items interchangeability with the preceding item, and the second is used to indicate the items interchangeability with the succeeding item listed at the same location.

Definition of Codes:

- **0** Indicates that the items are not interchangeable
- **1, 2** Indicates full interchangeability with the following applications:
ICY codes 1 and 2 are always used one with the other, and may be used for two items presented at the same Configuration Standard, or for two items at different Configuration Standards.
For two interchangeable items at the same Configuration Standard, code 1 identifies the item whose source of supply is running out and code 2 identifies the preferred, replacement, item. When the two interchangeable items are at different Configuration Standards the code 1 item is the pre-modified item and the code 2 the post-modification item.

- **3** Indicates an item that has a one way interchangeability with another (ICY code 5) item. The use of ICY code 3 is always accompanied with an ICY 5 item and is only applied to items presented at different Configuration Standards. Code 3 is applied to the pre-modified item and code 5 is applied to the post-modification item. A code 3 item is only used as a replacement where a code 3 item is installed, but a code 5 item may be used to replace either a code 3 or a code 5.
- **4** Indicates an item which is fully interchangeable with, but not identical to, other ICY 4 items. It is used only when the items are presented at the same Configuration Standard. When items are presented at different Configuration Standards, then codes 1-2 or 3-5 must be applied.
- **5** Indicates an item which has one way ICY with another (code 3) item. The use of ICY code 5 is always accompanied with an ICY code 3 item and is only applied to items presented at different Configuration Standards. See code 3 for details of application.
- **6** Indicates an item which has a qualified interchangeability with another ICY 6 item. The conditions under which this qualified interchangeability is operative is provided in the Description column (Description For Location content).
- **7** Not used
- **8** Not used
- **9** Indicates an item which is fully interchangeable with, and identical to, other ICY 9 items. It is used when a secondary Part Number is showing a Vendor allocated identity to a proprietary item, which can otherwise be supplied direct by the proprietary firm. In such cases the proprietary item is listed first, followed by the Vendors Part Number. A proprietary item is one which is identified by a Primary Reference Number as defined in ACodP 1. ICY 9 is used only when items are presented at the same Configuration Standard.

F. Applicable

The applicable column is made of two columns of numbers which identify the "Aircraft Number" the P/N is applicable to.

When the item is applicable to all the "Aircraft Number" of the fleet, the columns are left blank.

1-5 Cross Reference Index

The IPC includes a single Cross Reference Index. This Index is ordered in alphanumeric sequence and uses four different data elements as its Search Key.

In order to identify the data element which is being used as Search Key for a particular entry, a Search Key Code has been provided as follows:

Data element	Search Key Code
Part Number	P
Reference Designator	R

The data element being used as the Search Key, and provided in the second column of the Cross Reference Index, is not repeated in its own data element column. However, this is not the case when a Part Number of more than 20 characters is being used as the Search Key; in this instance the full Part Number is shown in the Part Number column.

The following data elements have been presented in the Index layout:

- SKC
- SEARCH KEY
- CH-SUBCH-UNIT-FIG-ITEM
- MFRC
- QTY PER ASSY

**CROSS REFERENCE BETWEEN FLEET SERIAL NUMBER (FSN) AND PRODUCTION
SEQUENCE NUMBER (PSN)**

Two series of identifying numbers are used to identify the C-27J Aircraft. These are the Manufacturers Production Sequence Numbers (PSN) and the Fleet Serial Numbers (FSN).

A Cross Reference between the Manufacturers Production Sequence Numbers (PSN) and the corresponding Fleet Serial Numbers (FSN) is provided in the Table below:

FLEET SN	Manufacturer's PSN
CHAD 001	04180

LIST OF ABBREVIATIONS

The following abbreviations are used in Section II of the IPC:

AC	Alternating Current	IPC	Illustrated Parts Catalogue

LIST OF MANUFACTURERS CODE AND ADDRESSES

The Nato Supply Code for Manufacturers identifies the design authority of the item as specified in the NATO Master Cross Reference List.

The list of the Manufacturers used in this issue of the Catalogue is given with denomination and address in the following table:

1-6 Correlation between Illustrated Parts Catalogue (-4) Zoning and Inspection Requirements Manual (-6) Zoning

Zone references are primarily used for indentifying the various compartments of the Aircraft, for such purposes as: maintenance, inspections, access panel entry, location work areas.

Each Figure of the IPC has been assigned to its physical location on the Aircraft, by the indication of the SubZone contained in the Figure Title.

The following table contains the Cross Reference between the Major and Minor Zones defined in the Inspection Requirements Manual (-6) and the Aircraft Zoning used in this Manual, with the description of each SubZone introduced.

Major Zones (Insp. Requis.)	Minor Zones (Insp. Requis.)	SubZones (IPC)	Description (IPC)
100	10	31-BA	Fuselage, nose section, Radome From Sta 1300 to Sta 2400 - Fr 1
	120	31-BB	Fuselage, nose section, Nose gear wheel well
	130	31-BC	Fuselage, nose section, Cockpit underfloor (pressurised zone) From Sta 2400 - Fr 1 to Sta 5100 - Fr 7
	140	31-BB	Fuselage, nose section, Nose gear wheel well
	150	31-BD	Fuselage, nose section, Cargo compartment underfloor From Sta 5100 - Fr 7 to Sta 6000 - Fr 9
		32-BA	Fuselage, center section, Cargo compartment underfloor From Sta 6000 - Fr 9 to Sta 14584 - Fr 29
200	210	31-AA	Fuselage, nose section, Cockpit From Sta 2400 - Fr 1 to Sta 5100 - Fr 7
	220	31-AB	Fuselage, nose section, Crew entrance From Sta 5100 - Fr 7 to Sta 6000 - Fr 9
	230	32-AA	Fuselage, center section, Cargo compartment From Sta 6000 - Fr 9 to Sta 9271 - Fr 16
	240	32-AB	Fuselage, center section, Cargo compartment From Sta 9271 - Fr 16 to Sta 11811 - Fr 23
	250	32-AC	Fuselage, center section, Cargo compartment From Sta 11811 - Fr 23 to Sta 13335 - Fr 26
	260	32-AD	Fuselage, center section, Cargo compartment From Sta 13335 - Fr 26 to Sta 14584 - Fr 29
	270	34-AA	Fuselage rear section, Aft fuselage section From Sta 14584 - Fr 29 to Sta 23014 - Fr 47
	290	34-AB	Fuselage rear section, Tail cone From Sta 23014 - Fr 47 to Sta 24000
300	310	35-AA	Empennage vertical, Fin - fuselage dorsal fairing
	320	35-AB	Empennage vertical, Fin
		35-AC	Empennage vertical, Rudder
	330	14-AA	Empennage horizontal Lh, Stabilizer

Major Zones (Insp. Requir.)	Minor Zones (Insp. Requir.)	SubZones (IPC)	Description (IPC)
		14-AB	Empennage horizontal Lh, Elevator
	340	24-AA	Empennage horizontal Rh, Stabilizer
		24-AB	Empennage horizontal Rh, Elevator
400	413	12-AC	Engine cowling Lh, Nacelle engine fwd section From Fr 0 to Fr 9
	414	12-AD	Engine cowling Lh, Nacelle engine aft section From Fr 9
	423	22-AC	Engine cowling Rh, Nacelle engine fwd section From Fr 0 to Fr 9
	424	22-AD	Engine cowling Rh, Nacelle engine aft section From Fr 9
	430	12-AA	Engine cowling Lh, Propeller
	440	22-AA	Engine cowling Rh, Propeller
500	510	11-AA	Outboard wing Lh, Wing leading edge
	520	11-AB	Outboard wing Lh, Wing box From Sta 9779 - Fr 18 to Sta 11515 - Fr 22
	530		
	540	11-AC	Outboard wing Lh, Aileron From Rib 33 to Rib 25
		11-AD	Outboard wing Lh, Outboard flaps From Rib 25 to Rib 14
	550	33-AA	Wing box center, Wing leading edge
		33-AB	Wing box center, Wing box From Sta 9779 - Fr 18 to Sta 11515 - Fr 22
		33-AC	Wing box center, Internal flaps From Rib 14 Lh to Rib 14 Rh
		33-BA	Wing box center, Fairing
600	610	21-AA	Outboard wing Rh, Wing leading edge
	620	21-AB	Outboard wing Rh, Wingbox From Sta 9779 - Fr 18 to Sta 11515 - Fr 22
	630		
	640	21-AC	Outboard wing Rh, Aileron From Rib 25 to Rib 33
		21-AD	Outboard wing Rh, Outboard flaps From Rib 14 to Rib 25
700	700	31-BB	Fuselage, nose section, Nose gear wheel well
900	910	31-AB	Fuselage, nose section, Crew entrance From Sta 5100- Fr 7 to Sta 6000 - Fr 9
	920		
	930	32-AD	Fuselage, center section, Cargo compartment From Sta 13335 - Fr 26 to Sta 14584 - Fr 29
	940		
	950	34-BA	Fuselage rear section, Ramp From Sta 14584 - Fr 29 to Sta 16534 - Fr 33
	960	34-BB	Fuselage rear section, Cargo door From Sta 16534 - Fr 33 to Sta 22114 - Fr 46
	975	31-AA	Fuselage, nose section, Cockpit From Sta 2400 - Fr 1 to Sta 5100 - Fr 7

Major Zones (Insp. Requis.)	Minor Zones (Insp. Requis.)	SubZones (IPC)	Description (IPC)
	990	32-AA	Fuselage, center section, Cargo compartment From Sta 6000 - Fr 9 to Sta 9271 - Fr 16
	995	32-AC	Fuselage, center section, Cargo compartment From Sta 11811 - Fr 23 to Sta 13335 - Fr 26
	911	13-AA	Landing gear fairing Lh, A.P.U. compartment From Sta 7747 - Fr 13 to Sta 9271 - Fr 16
	912	13-AB	Landing gear fairing Lh, Main landing gear & MLG well From Sta 9271 - Fr 16 to Sta 12827 - Fr 25
	913	13-AC	Landing gear fairing Lh, Main landing gear fairing aft section From Sta 12827 - Fr 25 to Sta 14584 - Fr 29
	921	23-AA	Landing gear fairing Rh, Conditioning compartment From Sta 7747 - Fr 13 to Sta 10059 - Fr 18b
	922	23-AB	Landing gear fairing Rh, Main landing gear & MLG well From Sta 10059 - Fr 18b to Sta 12827 - Fr 25
	923	23-AC	Landing gear fairing Rh, Main landing gear fairing aft section From Sta 12827 - Fr 25 to Sta 14584 - Fr 29

HOW TO USE THE IPC THE PART NUMBER UNKNOWN

- 1 Refer to "Table of Contents" and select the appropriate "Figure No.", reading listed titles
- 2 Turn to the illustration and find the part.
- 3 Refer to corresponding item number in the parts list.

HOW TO USE THE IPC
THE FIN NUMBER UNKNOWN

- 1 Refer to "Table of Contents" and select the appropriate "Figure No.", reading listed titles
- 2 Turn to the illustration and find the part.
- 3 Refer to corresponding item number in the parts list.

HOW TO USE THE CATALOG THE FIN NUMBER IS KNOWN

- 1 Find Reference Designator in the "search key" column of the numerical index.
Note chapter, subchapter, unit, figure and item number.
- 2 Turn to chapter, subchapter, unit and figure.
- 3 Locate part on illustration and in parts list by item number.
